Pearson Clinical
## Digital Assessment Solutions

Contents

An Introduction to Digital Solutions

Professionals around the world trust Pearson products to help them make informed decisions in their work to improve lives.

Here at Pearson, we know that modern healthcare needs to be continually transformed by innovation and technology, for you, the professional, to provide the best possible care efficiently.

That is why we have gone digital. We are proud that our innovative, researched based digital assessments and tools give you the ability to administer, score, and generate reports on a wide range of assessments with just a click of a button or taps of an iPad screen.

Our selection of innovative, research-based digital tools will transform the way you work, improve your workflow, and make you more efficient.

Improve Efficiency and Accuracy

Access from Anywhere

Save Time

User-friendly Interface

Explore the benefits of **going digital**

Conduct Remote Administrations

Online storage of assessment data for your organisation

Q-global®

a secure and affordable digital administration, scoring and reporting system

Introducing Q-global

Q-global™ is our secure and affordable web-based administration, scoring and reporting system that allows you to input results from paper-and-pencil assessments to generate scores, and produce accurate comprehensive reports.

It can also be used to administer questionnaire type assessments either on your screen or via a secure link emailed to the examinee or caregiver.

Certain assessment resources are now also available to use in a 'Telepractice' setting. Q-global® houses the industry's gold standard assessment tools that Speech Language Therapists, Occupational Therapists, SENCOs, and Psychologists can access through any device connected to an up-to-date web browser.

How does it work?

Q-global allows you to manage and retrieve examinee information, generate scores from assessment data, and produce accurate, comprehensive assessment reports. All these activities are performed in a secure, private web environment that helps professionals streamline their assessment workflow while complying with widely accepted data privacy standards. The web-based nature of Q-global provides you with unprecedented flexibility in accessing your assessment records and reports anytime and anywhere.

Q-global™

Better Insights. Anytime. Anywhere.

What are the benefits of Q-global?

Flexible delivery and reporting

Q-global® offers four different delivery and reporting options, to best suit your methods of assessment:

1. **On Screen administration (OSA)** - Conduct assessments on screen using your own device or set up a video proctoring session 'in platform' using Q-global VP.

2. **Remote On-Screen administration (ROSA)** - Send assessment via email to examinee, parent or caregiver to complete.

3. **Manual Entry** - Enter assessment data from a paper record form.

4. **Via Telepractice** - Deliver certain assessments via remote screensharing technology before entering data into the platform to score.

Once assessment data is received into the platform via any of the above methods, you can seamlessly generate a report. Options for delivery vary by assessment, see our availability matrix on page 5 for options.

Who can use Q-global?

Professionals including Speech Language Therapists, Occupational Therapists, SENCOs and Psychologists can use the Q-global® testing system to administer assessments, generate scores, and produce reports quickly and efficiently.

Qualification levels: All. Pearson Clinical Assessments products in the UK are assigned a qualifications level of either A, B or C (with C being the highest qualification level).

Qualification Level	Explanation
Level **A**	This approval level enables you to buy our assessments that require no professional degree, accreditation, organisation membership, or license/certificate.
Level **B**	This approval level enables you to buy our assessments requiring A or B qualification levels.
Level **C**	This approval level enables you to buy all our assessments.

Q-interactive®

1:1 iPad-based testing system that helps administer, score, and report different clinical assessments.

Introducing Q-interactive

Q-interactive is an easy-to-use iPad application that allows clinicians to choose, administer and score assessments via two tablets that connect to each other. The system is ideal for educational and clinical psychologists, SLTs, and SENCO's.

With Q-interactive, you can create personalized batteries at both the instrument and subtest levels that are proven to:

- Better serve your clients and evolve your practice.

- Minimize time spent on administering tests.

- Streamline workflow and reduce manual data entry.

How does it work?

1. Assessment administration occurs using two iPads that talk to each other via Bluetooth connection. With just a tap of a finger, you can easily customize a battery based on client's needs. Administer the full test, or only the subtests that you need.

2. You use one tablet to read administration instructions, record, and score responses, take notes, and control visual stimuli. The client uses the other to view and respond to stimuli.

3. Real time scoring means once you have completed the assessment battery, you can instantly view subtest scores and notes. Encrypted data is stored on your iPad and then synchronized over a secure connection to our server where it is stored in an encrypted database with industry-standard technology.

What are the benefits of Q-interactive?

Lightweight, easy and saves time and money

- **Travel Light** - Your assessment tools are now contained within two lightweight digital tablets, that will allow you to conduct assessments even when you are offline. No more lugging around heavy kits, a timer, stacks of record forms and stimulus booklets.

- **Easy** - The content and administration procedures of many assessments will be recognizable. Combine that with an intuitive user interface and you will benefit from more time to focus on your clients and interpreting their results.

- **Save Time** - Automatic, real-time scoring improves accuracy and cuts down scoring time. Anecdotal evidence suggests that once you are proficient, Q-interactive can reduce the overall time spent on your assessment including scoring and reporting by 30%.

- **Reduce Costs** - With Q-interactive you only pay for what you use and are not required to invest in a complete test kit. Your test library is also automatically updated with new editions of assessments as soon as they are released, saving your initial outlay on new assessments. Access to test manuals is also included as standard.

- **Customise** - Tailor your battery to fit the specific need of your client. Control the administration time and depth of assessment by administering the full test, or only the subtests that you need.

Who can use Q-interactive?

The system is ideal for Psychologists, Speech Therapists and SENCO's.

Qualification Level	Explanation
Level **A**	This approval level enables you to buy our assessments that require no professional degree, accreditation, organization membership, or license/certificate.
Level **B**	This approval level enables you to buy our assessments requiring A or B qualification levels.
Level **C**	This approval level enables you to buy all our assessments.

Pearson Clinical Assessment

Digital Decision Tree

DAL

Digital Assessment Library

Introducing DAL

A digital assessment library is a package that provides access to all Pearson Clinical UK's digital assessment content for a simple, annual price. No more estimating the number of digital manuals, scoring subscriptions or usages needed, no more dealing with raising multiple orders and payment of invoices!

We offer two DAL packages. DAL-H (Digital Assessment Library for Healthcare) and DAL-U (Digital Assessment Library for Universities.

DALU

Digital Assessment Library for Universities

Introducing DALU

With the increased need for remote learning, as well as face–to–face teaching not always possible at university, we have made many of our most popular digital test manuals and stimulus books available on our Q–global and Q–interactive platforms for you and your cohort to access.

The Digital Assessment Library for Universities (DALU) will provide a remote and more flexible in person teaching solution for university course leaders, plus give students and staff the ability to practice assessments via a telehealth platform and review assessment content online in their own time.

This simple annual subscription will give staff and students access to some of Pearson's most popular Psychology, Speech and Occupational Therapy digital test manuals and stimulus material on Q–global and Q–interactive.

We currently offer two types of DALU licenses:

[DALU for Psychology](#)
(£120/per person/ per year)

[DALU for Allied Health](#)
(£65/ per person/ per year)

What are the benefits of DALU?

Access to gold standard assessments, anywhere, anytime

DALU provides you and your students with access to our industry leading Q-platforms enabling you and your students to access many of our gold standard assessments, anywhere, anytime

- The first step in gaining access to a DALU license(s) is by signing your institution up as a member of our Training Partnership Program (TPP). TPP membership includes the ability to purchase DALU licenses, as well as discounted rates on paper kits and record forms for those assessments not available digitally

- Once your institution is confirmed as a TPP member, we will contact you to discuss your specific DALU license requirements.

How to join

DALU provides you and your students with access to our industry leading Q-platforms enabling you and your students to access many of our gold standard assessments, anywhere, anytime.

The first step in gaining access to a DALU license(s) is by signing your institution up as a member of our Training Partnership Program (TPP). TPP membership includes the ability to purchase DALU licenses, as well as discounted rates on paper kits and record forms for those assessments not available digitally

Once your institution is confirmed as a TPP member, we will contact you to discuss your specific DALU license requirements.

Assessments included

Wechsler Intelligence Scale for Children | Fifth UK Edition

WISC-V UK

The most proven and trusted cognitive ability measure ever

The Wechsler Intelligence Scale for Children®– Fifth UK Edition (WISC®–VUK) is the latest version of the most proven and trusted cognitive ability measure ever. WISC®–VUK has been redesigned to give you a truly comprehensive picture of a child's abilities and includes notable improvements to make identifying issues and finding the solutions faster and easier.

Age range: 6 to 16 years 11 months

Administration: Individual – approx. 60 mins

Platform: Available on Q-global, Q-interactive and DALU Psychology

Wechsler Adult Intelligence Scale | Fourth UK Edition

WAIS-IV UK

Helps you make realistic comparisons of performance between intelligence and memory

The WAIS-IVUK was developed to provide you with the most advanced measure of cognitive ability in adolescents and adults with a variety of neurological conditions. This test can be used to identify strengths and weaknesses, guide cognitive treatment and to provide reliable information for neuropsychological evaluations.

Age range: 16 years 90 years 11 months

Administration: Individual – 75 mins

Platform: Available on Q-global, Q-interactive and DALU Psychology

14

Wechsler Memory Scale | Fourth UK Edition

WMS-IV UK

Assess verbal and non-verbal memory abilities in adults. Co-normed with WAIS-IVUK

The Wechsler Memory Scale – Fourth UK Edition is an individually administered assessment of memory and working memory. The WMS–IVUK also contains a brief evaluation of cognitive status. It has been developed to decrease testing time, reduce examinee fatigue, and improve the psychometric functioning of the subtests in older adults.

Age range: 16 years to 90 years 11 months

Administration: Individual – 75 mins

Platform: Available on Q-global, Q-interactive and DALU Psychology

Wechsler Individual Achievement Test | Third UK Edition

WIAT-III UK

Reliably measure and assess reading, language and numerical attainment in one test

Wechsler Individual Achievement Test - Third UK Edition (WIAT®-IIIUK) is the latest version of the most reliable and comprehensive assessment of reading, language and numerical attainment. The WIAT®-IIIUK is suitable for use in a variety of educational, clinical and research settings.

Age range: 4 to 25 years 11 months

Administration: Individual – 45 to 90 mins depending on age of the examinee

Platform: Available on Q-global, Q-interactive and DALU Psychology

Wide Range Achievement Test | Fifth Edition

WRAT5

Efficiently measure and monitor foundational academic skills

The WRAT5 is easy to administer screener that provides an accurate way to identify possible learning disabilities, assess and monitor reading, spelling, and maths skills and helps to identify possible learning disabilities. You can test learners of all ages with only the subtests that are needed.

Age range: 5 years to 85+ years

Administration: Individual – Ages 5-7: 15 to 25 mins; Ages 8 and older: 35 to 45 mins

Platform: Available on Q-global and Q-interactive

Kaufman Test of Educational Achievement | Third Edition

KTEA-3

Easily identify and assess strengths and weaknesses in key academic skills

The Kaufman Test of Educational Achievement, Third Edition (KTEA–3) helps you to quickly and easily identify strengths and weaknesses, to help you determine the right intervention to follow-up with. This test is an individually administered measure of academic achievement that evaluates key reading, maths, written language, and oral language skills.

Age range: 4 years to 25 years 11 months

Administration: Dependant on examinee's age

Platform: Available on Q-global and Q-interactive

Clinical Evaluation of Language Fundamentals | Fifth Edition

CELF-5 UK

Identify children's and young people's communication challenges, wherever they may be

The CELF-5UK is a comprehensive, UK normed battery of tests that offers a streamlined, flexible approach to language assessment. It provides speech and language professionals highly accurate diagnostic information with current normative data, reflecting the UK's diverse population.

Age range: 5 years to 21 years 11 months

Administration: Individual – 30 to 45 mins

Platform: Available on Q-global, Q-interactive and DALU Allied Health

Goldman-Fristoe Test of Articulation | 3

GFTA-3

Accurately assess speech sound disorders

With new print and digital editions, the updated GFTA™-3 and KLPA™-3 offer the best choices for assessing speech sound disorders. The updated GFTA™-3 introduces exciting new features that make it easier than ever to obtain the accurate diagnostic information you need.

Age range: 2 years to 21 years 11 months

Administration: Individual – 5 to 15 mins

Platform: Available on Q-global, Q-interactive and DALU Allied Health

Khan-Lewis Phonological Analysis | Third Edition

KLPA-3

The KLPA-3 helps make informed therapy decisions based on the most current research with updated normative information

The new Khan-Lewis Phonological Analysis, Third Edition (KLPA-3) works with Goldman-Fristoe 3 to help determine if use of phonological processes are contributing to an individual's speech sound disorder.

Age range: 2:0 - 21 11 months

Administration: Individual – 10 to 30 minutes

Platform: Available on Q-global, Q-interactive and DALU Allied Health

Everyday Memory Survey

EMS

Everyday Memory Survey (EMS) is a set of rating scales designed to assess everyday memory in adults.

The EMS affords clinicians and other care providers a quick, reliable, and valid way to ecologically monitor, manage, and treat patients with known or potential memory impairment.

Age range: 18 to 90 years

Administration: 10 minutes

Platform: Available on Q-global

Expressive Vocabulary Test | Third Edition

EVT-3

Easily measure expressive vocabulary and word retrieval in children and adults

The Expressive Vocabulary Test, Third Edition (EVT-3) is a norm-referenced, individually administered test of expressive vocabulary and word retrieval based on words in Standard American English. The EVT-3 maintains the basic format and qualities of the EVT-2 (e.g., parallel forms, stimulus questions, easy administration and response capture, accurate scoring) with additional upgrades and digital applications.

Age range: 2 years and 6 months to 90+ years

Administration: Individual – 10 to 15 mins

Platform: Available on Q-global, Q-interactive and DALU Allied Health

NEPSY | Second Edition

NEPSY-II

NEPSY-II is used for general, diagnostic and selective, or full assessments — from a basic overview of a child's neurological status to a full comprehensive neuropsychological evaluation.

The NEPSY® Second Edition (NEPSY®-II) is the only single measure that allows clinicians to create tailored assessments across six domains, specific to a child's situation. NEPSY®-II results provide information relating to typical childhood disorders, enabling accurate diagnosis and intervention planning for success in school and at home.

Age range: Age Range: 3 to 16 years

Administration: General Assessment: Preschool ages - 45 minutes; School ages - 1 hour. Diagnostic & Selective Assessment: Varies. Full Assessment: Preschool ages - 90 minutes; School ages - 2 to 3 hours

Platform: Available on Q-global, Q-interactive and DALU Allied Health

Delis-Kaplan Executive Function System

D-KEFS

A comprehensive assessment of higher-level thinking and cognitive flexibility.

The Delis-Kaplan Executive Function System (D-KEFS) is the first nationally standardised (US norms) set of tests to evaluate higher level cognitive functions in both children and adults. With nine stand-alone tests, it comprehensively assesses the key components of executive functions believed to be mediated primarily by the frontal lobe.

Age range: 8 years to 89 years

Administration: Individual – 90 mins

Platform: Available on Q-global, Q-interactive and DALU Psychology

Repeatable Battery for the Assessment of Neuropsychological Status Update

RBANS Update

Provides significant improvements and is ideal for measuring change over time.

Offering valuable enhancements, the Repeatable Battery for the Assessment of Neuropsychological Status Update® (RBANS® Update) is a brief, individually administered battery to measure cognitive decline or improvement. Guidance on using this test in your telepractice.

Age range: 8 years to 89 years

Administration: Individual – 90 mins

Platform: Available on Q-global, Q-interactive and DALU Psychology

California Verbal Learning Test | Third Edition

CVLT3

**Assess verbal learning and memory deficits in adults**

The CVLT-3 is the most comprehensive and detailed assessment of verbal learning and memory for older adolescents and adults ages 16 and older. In this assessment, an examinee listens to series of words and is then asked to recall the terms and the category to which they belong. The CVLT is considered to be the most sensitive measure of episodic verbal learning.

Age range: 16 years to 90 years

Administration: Individual – 30 mins, plus 30 mins delay

Platform: Available on Q-global, Q-interactive and DALU Psychology

California Verbal Learning Test Children's Version

CVLT-C

Provides significant improvements and is ideal for measuring change over time.

CVLT®-C California Verbal Learning Test® Children's Version is used to assess verbal learning and memory in children and adolescents. Useful in various settings to identify learning and memory difficulties, isolate deficient learning strategies, and assist in designing remediation programs.

Age range: 5 years to 16 11 months

Administration: 15 to 20 minutes, plus a 20-minute interval to accommodate delayed recall measure

Platform: Available on Q-global, Q-interactive and DALU Psychology

Privacy and Security

The Q-Global and Q-Interactive platforms are accredited under the European Union's Medical Devices Directive 93/42EC (MDD) for the CE Mark as a Tier 1 medical device. They should only be used by licenced and qualified practitioners to assist in making professional decisions and diagnosis. Pearson's accreditation is valid under MDD until May 2024.
