TRADE SECRET INFORMATION

Not for release under HIPAA or other data disclosure laws that exempt trade secrets from disclosure.

INTRODUCTION

The Posttraumatic Stress Diagnostic Scale (PDS) is designed to aid in the diagnosis of posttraumatic stress disorder based on *DSM-IV* criteria. The individual's Symptom Severity Score, Number of Symptoms Endorsed, Symptom Severity Rating, and Level of Impairment in Functioning indicate the level of distress he or she is experiencing.

The information in this report must be used in conjunction with professional judgment, taking into account the total context of the instrument's administration and any other pertinent information concerning the individual.

PTSD DIAGNOSIS

This individual endorsed items in a manner that is consistent with a *DSM-IV* diagnosis of posttraumatic stress disorder (PTSD). All of the six criteria were met.

DESCRIPTION OF THE TRAUMATIC EVENT

The individual reported experiencing a sexual assault by a stranger. This occurred one to three months ago.

During the traumatic event, he was physically injured and his life was in danger. He also reported feeling helpless and terrified.

SYMPTOM DESCRIPTION

The individual reported that he has been bothered by the following symptoms for one to three months. According to *DSM-IV*, the specifier "acute" should be used to describe PTSD symptoms of this duration.

Reexperiencing Symptoms

DSM-IV requires one or more "reexperiencing" symptoms to be endorsed. The individual endorsed all of the 5 possible symptoms. The symptoms and his responses follow.

- 22. Omitted Item
2 to 4 times a week/half the time
- 23. Omitted Item
Once a week or less/once in a while
- 24. Omitted Item
2 to 4 times a week/half the time
- 25. Omitted Item
2 to 4 times a week/half the time
- 26. Omitted Item
Once a week or less/once in a while

Special Note:

The content of the test items is included in the actual reports. To protect the integrity of the test, the item content does not appear in this sample report.

Avoidance Symptoms

DSM-IV requires three or more "avoidance" symptoms to be endorsed. The individual endorsed 6 of the 7 possible symptoms. The symptoms and his responses follow.

- 27. Omitted Item
2 to 4 times a week/half the time
- 28. Omitted Item
2 to 4 times a week/half the time
- 30. Omitted Item
2 to 4 times a week/half the time
- 31. Omitted Item
2 to 4 times a week/half the time
- 32. Omitted Item
2 to 4 times a week/half the time
- 33. Omitted Item
Once a week or less/once in a while

Arousal Symptoms

DSM-IV requires two or more "arousal" symptoms to be endorsed. The individual endorsed all of the 5 possible symptoms. The symptoms and his responses follow.

- 34. Omitted Item
2 to 4 times a week/half the time
- 35. Omitted Item
Once a week or less/once in a while
- 36. Omitted Item
2 to 4 times a week/half the time
- 37. Omitted Item
5 or more times a week/almost always
- 38. Omitted Item
2 to 4 times a week/half the time

SYMPTOM SEVERITY RATING

The Symptom Severity Rating is based on the Symptom Severity Score. This individual's Symptom Severity Score is 29, and his Symptom Severity Rating is Moderate to Severe. (The Moderate to Severe category includes scores from 21 to 35.)

LEVEL OF IMPAIRMENT IN FUNCTIONING

This individual's Level of Impairment in Functioning is Moderate. He reported that his symptoms have interfered with his sex life, work, fun and leisure activities, relationships with friends, relationships with his family, and general satisfaction with life in the past month.

End of Report

NOTE: This and previous pages of this report contain trade secrets and are not to be released in response to requests under HIPAA (or any other data disclosure law that exempts trade secret information from release). Further, release in response to litigation discovery demands should be made only in accordance with your profession's ethical guidelines and under an appropriate protective order.
