

ADOS-2 Clinical Workshop Booking Form

Date: 28th to 29th January 2015 | Location: London

£500.00 exc VAT for two days

College of
Occupational
Therapists

Clinical Workshop Overview: This workshop is for professionals unfamiliar with the ADOS-2; it will provide an introduction and guidance on the use of the ADOS-2 for the purposes of clinical assessment. Our experienced trainer will describe the ADOS-2 and demonstrate administration and scoring, operationalising diagnostic criteria for ASD. You will have the opportunity to practice scoring with guidance from the trainer on the nuances of administration and coding the ADOS-2. The workshop focuses primarily on Modules 1 to 4; materials are provided in order to complete training in the Toddler Module following the workshop.

An important component of the workshop is the **Pre and Post Course Materials** which are included in the cost of the workshop. These materials include two DVDs focused on Modules 1 to 4 and one DVD/Guidebook providing training in the Toddler Module. Participants should familiarise themselves with the pre-course materials in preparation for the workshop. After the workshop, participants use the post-course materials to reinforce skills learned and complete training in the Toddler Module. The Pre and Post Course Materials amount to approximately 10 hours of required self directed learning.

Who is the course aimed at:

- **For clinicians** with a prior background in autism and formal testing this 2-day workshop is sufficient to support use of the ADOS-2 to inform the diagnosis of autism and autism spectrum disorders. Physicians, psychologists, occupational therapists, and speech-language therapists will be better prepared to make diagnostic and educational decisions, and evaluate programs after completing the workshop. In addition it is recommended that at least one person from each setting/organisation using ADOS-2 has attended a research reliability training.
- **Individuals** with less background in testing but who provide services for individuals and families affected by autism may take the workshop for informational purposes.
- **Researchers** who plan to use the ADOS-2 in research need to attend in-person research workshops. Pearson does not run research reliability workshops, but it is recommended that at least one person from each setting/organisation using ADOS-2 has attended a research reliability training. The 5 day research reliability training is offered independently by trainers whose details can be found on the designated UK ADOS trainers' page.
- If you require longer in-person training with less self-directed learning, then it is recommended you attend a full research reliability training event.
- **Note:** Attendance on the course does not guarantee qualification to purchase ADOS-2; access to test materials is governed by our qualification criteria, please see our registration information page for further details.

Cost of the workshop is **£500.00 plus VAT for 2 days**. This includes:

- All course materials (including pre and post course materials, and protocols for use during the workshop).
- 10% discount on all ADOS-2 products (discount code will be provided prior to the workshop, and valid for 1 month following the workshop)
- Lunch and refreshments.

Trainer Biography: Dr Fiona Scott, Managing Director of Spectrum Specialist Consultancy Ltd is a Consultant Chartered Psychologist with 20 years experience researching, training and doing clinical work with autism spectrum disorders. Dr Scott is also an accredited International ADOS (autism diagnostic observation schedule) and ADI-R (autism diagnostic interview – revised) Trainer and has been running professional training courses on these instruments for over 10 years. Following a Doctorate at the Institute of Psychiatry in London, and a Lectureship at the University of Greenwich she spent 7 years as a research associate at the University of Cambridge Autism Research Centre, went on to hold an Honorary Senior Research Associate position with the ARC from 2005 – 2010, and is currently a Visiting Academic in the Department of Psychiatry, University of Cambridge, and a collaborative researcher with the Department of Psychiatry, University of Leicester.
