Wechsler Individual Achievement Test® – Third UK Edition

More diagnostic power from the achievement test you trust
Administrating WIAT®-IIIUK

The WIAT®-IIIUK is an individually administered instrument designed to assess oral language, reading, written language, and mathematics.

The WIAT®-IIIUK is suitable for use in a variety of educational, clinical, and research settings, including schools, colleges, clinics, private practice, and residential settings.

Use WIAT®-IIIUK results to:

- Identify the academic strengths and weaknesses of a student.
- Inform decisions regarding eligibility for educational services, educational placement, or diagnosis of a specific learning difficulty.
- Plan intervention and measure progress.

WIAT-IIIUK – A comprehensive assessment of achievement skills

Continuing the Tradition of Wechsler Integrity in Achievement Assessment

Many generations of clinicians have depended on Wechsler assessments for rich, reliable information about an individual’s achievement and ability. Building upon the Wechsler reputation for excellence and quality, we update and enhance editions to reflect the most current data and research available.

The WIAT®-IIIUK continues in that tradition, incorporating the best features of the original WIAT®-IIUK and WIAT®-IIUK, while offering valuable new benefits. This latest edition is designed to improve the diagnostic power and sensitivity of subtests and to provide maximally informative scores, skills analysis, and intervention goal statements.

Image: Said Tayar Segundo
**What’s New?**

**WIAT®-III UK** has 16 subtests including three new subtests: Early Reading Skills, Oral Reading Fluency, and Maths Fluency. Each subtest has a specific age range.

The **WIAT®-III UK** provides two types of analyses to aid in the identification of specific learning difficulties: the traditional Ability Achievement Discrepancy (AAD) analysis and the Pattern of Strengths and Weaknesses (PSW) Discrepancy analysis.

Other new features include:

- UK norms from 4 years 0 months to 25 years 11 months.
- Updates to support EHCP, DSA and AA requirements, and best practice.
- New subtests – Early Reading Skills, Oral Reading Fluency and Maths Fluency.
- Enriched Listening Comprehension, Oral Expression, and Written Expression subtests.
- Oral Reading Fluency subtest: options to report supplementary standard scores and cumulative percentage for Oral Reading Accuracy and Oral Reading Speed.
- Standard scores for all subtests.
- Comparisons with Wechsler ability scores.
- Improved scoring rules.
- Age-specific scoring examples in a scoring workbook to assist examiners in learning and using the scoring rules.
- Quick Score Guides for Sentence Composition and Essay Composition: Theme Development and Text Organisation.

**Improved Usability of Materials**

Redesigned Record Form
All administration instructions are conveniently located in the record form.

The new **WIAT®-III UK** two-sided stimulus book makes administration easier. The stimulus book is used only for select subtests, and only one stimulus book is now required.

---

The stimulus book is used only for select subtests, and only one stimulus book is now required.
Note: The figure shown excludes the the Total Achievement composite. The Early Reading Skills subtest only contributes to the Total Achievement composite. Subtests in shaded boxes do not contribute to the Total Achievement composite.
Skills Analyses

The skills analyses in the WIAT®-IIIUK are optional and highly recommended qualitative evaluations of a student's performance on several WIAT®-IIIUK subtests.

Item-level skills analyses are provided for the Early Reading Skills, Reading Comprehension, Maths Problem Solving, and Numeracy subtests.

More detailed, within-item skills analyses are provided for the Word Reading, Pseudoword Decoding, and Spelling subtests. Evaluating performance at the skill level provides information about a student's specific strengths and weaknesses that may be used to plan targeted interventions.

Q-global® – Save Valuable Time, Obtain Accurate Results

The WIAT®-IIIUK is available on Q-global®, Pearson’s web-based platform for scoring and reporting. It’s accessible anytime, from any computer connected to the Internet. Secure and affordable, this system helps you quickly and automatically organise information, generate scores, and produce accurate, comprehensive reports. To create your Q-global® account visit pearsonclinical.co.uk/qglobalaccount and complete the online form.

Q-global® also offers:

- 24-hour web-based access.
- Access from any computer, tablet or mobile device with an internet connection.
- On-demand, reliable scoring and reporting solutions not available via hand-scoring.
- Pricing on a per-report or subscription basis.

Other features of the new scoring software include:

- Enhanced skill analysis for core subtests at item level and sub-item level.
- Customised goal statements, including annual goals and short-term objectives, for core subtests to assist with setting goals and help develop planning for intervention.
- Research-supported alternatives for identifying specific learning difficulties.
- Parent Report, with a description of each subtest, as well as information to help parents and carers understand the WIAT®-IIIUK scores.
Choose The Format That Is Right For You

Now you have the option to choose the traditional paper-and-pencil format, or the new digital format on Q-interactive®. These options provide even more convenience and flexibility.

Pencil-and-paper format

Scoring and reporting: Hand scoring or new web-based scoring on Q-global®.

Digital format on Q-interactive®

Q-interactive® includes access to the same content as the WIAT™-IIIUK paper-and-pencil format, plus to an expanding library of assessments including WISC®-VUK, WAIS®-IVUK, WMS®-IVUK, KTEA™-3, NEPSY®-II, and D-KEFS™.

Scoring and reporting: Real-time scoring and immediate access to results and reports make interpreting test results easier and more time saving than ever before.

Now Available!

Available October 2017!
Why Q-interactive®?

Q-interactive® walks you through administering a test, providing you with item level administration directions, display of stimuli, capture of the child's responses and scoring.

With Q-interactive® you can:
- Focus more on the client due to fewer test materials to manage.
- Eliminate the need to look up scores as Q-interactive® provides immediate scores and results.
- Trust your client data is securely stored.
- Be confident in your Q-interactive® test results as each subtest type undergoes an equivalency study.

As a Q-interactive® user, you have immediate access to the following WIAT®-III®UK scores:
- Patterns of Strength and Weaknesses.
- Process.
- Ancillary.

If you also have access to the WISC®-V®UK on Q-interactive®, you can generate an Ability Achievement Discrepancy Analysis.

Benefits of digital administration:
- **Oral Reading Fluency** - you can record errors directly on your tablet.
- **Oral Discourse Comprehension** - Audio stimuli will play through the tablet, eliminating the need for a recorder.
- **Receptive Vocabulary** - Scores will automatically calculate based on how the client responds on their tablet.

All the WIAT®-III®UK subtests can be administered on Q-interactive®:
- Listening Comprehension
- Oral Expression
- Early Reading Skills
- Word Reading
- Pseudoword Decoding
- Reading Comprehension
- Oral Reading Fluency
- Alphabet Writing Fluency
- Sentence Composition
- Essay Composition
- Spelling
- Maths Problem Solving
- Numeracy
- Maths Fluency
