

Social-emotional skills **CAN** be taught—& improved!

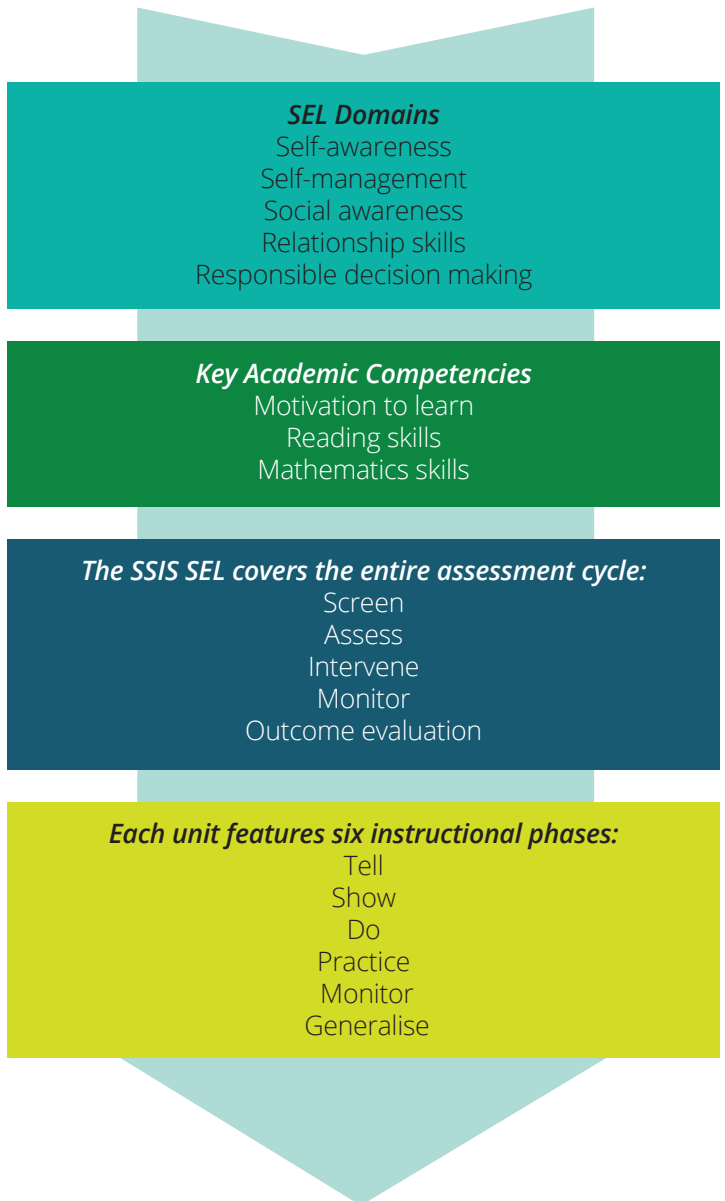

Everyone wins when students' negative behaviour decreases and their learning opportunities and academic achievement increase. However a deficit in any of the five key social-emotional skills — self-awareness, self-management, social awareness, relationship skills, responsible decision making — can lead to behaviour and emotional difficulties, as well as less involvement in academics.

SSIS SEL gives you the tools you need to help students succeed.

Fully aligned with the CASEL framework, the SSIS SEL edition is a **comprehensive social and emotional skills learning (SEL) solution** that provides evidence-based tools to assess and *teach skills in each of the five SEL domains as well as the three key academic competencies* established in the original Social Skills Improvement System. It provides universal intervention for students ages 4 through 14 years, and can also be used for small groups in Tier 2 and 3 interventions.
