

Assess, support, and monitor children and youth with the Autism Spectrum Rating Scales — now available on Q-global

The Autism Spectrum Rating Scales™ (ASRS®) is a multi-informant measure designed to identify symptoms, behaviors, and associated features of autism spectrum disorder (ASD) in children and adolescents aged 2 to 18 years.

- Assists in the diagnostic process
- Guides the development of intervention and treatment strategies
- Monitors response to intervention and treatment effectiveness
- Now available on Q-global®

Features

- First nationally standardized, norm referenced ASD Rating Scale
- Easy administration, scoring, and results interpretation
- Excellent reliability and validity
- Short version can be used for screening or treatment monitoring
- Spanish version available
- Items assess DSM-5 symptom criteria for ASD
- Option to score children with limited verbal abilities
