

DASH-2

Detailed Assessment of the Speed
of Handwriting, Second Edition

**Identify
children and
young adults
with handwriting
speed difficulties**

DASH-2 Overview

The updated Detailed Assessment of the Speed of Handwriting, Second Edition (DASH-2) is a reliable measure of handwriting speed for children and young adults. DASH-2 helps identify functional handwriting difficulties and provides both quantitative and qualitative information useful for intervention planning.

DASH-2 Benefits

- Provides norm-referenced scores for handwriting speed
- Offers objective evidence on which to base applications for special accommodations in education settings
- Suitable for both individual and group administration
- Offers data you can trust with updated normative sample collected between 2021 and 2023

DASH-2 Features

The updated DASH-2 includes all of the features and benefits of the bestselling previous edition, with some modifications that will expand its usefulness and make it even more user-friendly. DASH-2 includes 4 core subtests that allow comparison of handwriting performance during tasks with varying demands.

- Copy Best
- Copy Fast
- Alphabet Writing
- Free Writing

A supplementary Graphic Speed task measures control of the writing implement at speed.
