

# MABC-3

Movement Assessment Battery for Children,  
Third Edition

## Measure gross and fine motor coordination in children and young adults aged 3–25 years.

The Movement ABC-3, the latest version of the trusted Movement Assessment Battery for Children, is designed to assess gross and fine motor skills in children and young adults up to 25 years and 11 months. Comprising Manual Dexterity, Aiming & Catching, and Balance & Locomotion, this new version includes all the features and benefits of the bestselling previous edition, with some modifications that will expand its usefulness and make it even more user-friendly.

### Some of these changes include:

- An expanded age range that extends from 3 years up to 25 years and 11 months
- An additional Manual Dexterity item per age band
- An additional Aiming & Catching item per age band
- Digital scoring and reporting options on Q-global
- Revised and enhanced Qualitative Observations for each task
- Expanded and updated Checklists for each age band
- Greater alignment of tasks between age bands, and between the Test and Checklist
- Checklist manual and forms available separately for users who don't need the full kit
